## ENVIRONMENTAL DATA ON A FINANCIAL CONTROL BASIS

The table below reports data for Canadian Utilities Limited (CU, CU.X).

Environmental data reported in the Sustainability Report is on an operational control basis which includes 100 per cent for facilities where Canadian Utilities Limited, or one of its subsidiaries, has operational control, regardless of percentage of financial ownership. Operational control is defined in alignment with the GHG Protocol.

As sustainability reporting standards and requirements evolve, we continue to progress our disclosures to meet the needs of shareholders, investors, and other stakeholders. In line with this effort, data for select environmental indicators reported below is broadly guided by the GHG Protocol's definition of financial control. The treatment of various entities may be addressed differently in Canadian Utilities Limited's 2019 Annual Report with respect to financial performance.

## **TASK FORCE ON CLIMATE-RELATED FINANCIAL DISCLOSURES**

Canadian Utilities Limited has always been a proponent of reporting core non-financial information and indicators to provide meaningful, efficient and transparent disclosures in priority areas for customers of our sustainability reporting (i.e. investors, business partners, customers, communities, Indigenous groups, employees, and governments).

In 2019, Canadian Utilities expanded alignment to the Financial Stability Board's Task Force on Climate-related Financial Disclosures (TCFD) recommendations. We have provided available mapping to existing disclosures below, and plan to continue to evolve our external disclosure around climate risks and opportunities in alignment with the TCFD recommendations.

For more information on the TCFD please visit [www.fsb-tcf.org](http://www.fsb-tcf.org).
